

“ICTR by Satellite”

Introducing the ICTR’s Satellite Service – “ICTR by Satellite”

The International Criminal Tribunal for Rwanda is pleased to introduce its TV Satellite Service known as “*ICTR by Satellite*”. This service provides ICTR-related information for professionals working in television and radio and for institutions and persons interested in the ICTR legal process.

As its name suggests, “*ICTR by Satellite*” is transmitted via satellite using a non-coded signal. This service is presently available in Africa, Europe, Asia and the Americas (see footprint).

ICTR offers live coverage from the Trial Courts, thematic raw footage and completed programmes related to the ICTR activities.

Information available on “ICTR by Satellite”

“ICTR by Satellite” will feature:

Live coverage in English and Kinyarwanda

- Live coverage of pre-trial and trial proceedings in each of the Trial Chambers
- Live coverage of pronouncement of judgments and sentences

Satellite uplink

- ICTR by satellite also offers to TV stations an uplink feed point for news related to the work of the ICTR.

On-Site Access

ICTR’s Audiovisual Unit is offering (free of charge) the following facilities on site:

- DV Cam playouts (PAL)
Note: uplink from NTSC is possible if you are carrying a transcoder NTSC-PAL. Playouts from your DVC Pro or Beta SX are also possible.
- Stand-up position (the ICTR building is the backdrop to the shot)
- Live signal of court hearings
- Copies from court sittings on DV Cam
- Access to photographs from the ICTR library collection.

Transmission schedule

For information in respect to subscribing to “*ICTR by Satellite*” or for the programme schedule in your area, click on the “*ICTR by Satellite*” link on the ICTR website.

Condition of use

The service is entirely free of charge and may be shared, free of charge, for non-commercial purposes, with prior permission of the ICTR. By “non-commercial purposes” the ICTR means expressly for information or educational purposes where no charge is imposed by the distributor. Person or party distributing the information is required to state the source as “*ICTR by Satellite*”. Sharing of the service for commercial purposes is strictly prohibited.

Satellite specifications

Satellite: Intelsat 907
Orbital position: 27.5 W, 332.5 E
Transponder: 86
Downlink Frequency: 4106.4632 MHz (C BAND)
B Polarization (Left Circular)
Symbol Rate: 1.384144
FEC QPSK 3/4
Decoder card: not required
DVB PAL system
